

AZURE ARC

AZURE ARC

Agenda

- What?
- Why?
- How much?

- How?
- Demo
- Q & A

What?

What?

**Azure management of stuff
that's not in Azure**

What?

- Servers
- Kubernetes
- SQL
- vSphere
- SCVMM
- Azure
Stack HCI

How?

How?

How does *Azure Arc* work?

How?

Servers and SQL:

- **Connected Machine Agent**
- **Extension**

Kubernetes:

- **11 agents**

vSphere, SCVVM and Azure Stack HCI:

- **Resource bridge**

How?

Servers and SQL:

- **Connected Machine Agent**
- **Extension**

Kubernetes:

- **11 agents**

vSphere, SCVVM and Azure Stack HCI:

- **Resource bridge**

How?

Servers and SQL:

- **Connected Machine Agent**
- **Extension**

Kubernetes:

- **11 agents**

vSphere, SCVVM and Azure Stack HCI:

- **Resource bridge**

How to onboard?

Servers and SQL:

- Generated script
- Auth via device login or service principal
- Extension manually or automatic

Kubernetes:

- Generated script
- Need kubeconfig, helm 3 and context

vSphere, SCVVM and Azure Stack HCI:

- Generated script
- Windows Admin Center
(Azure Stack HCI)

How to onboard?

But first!

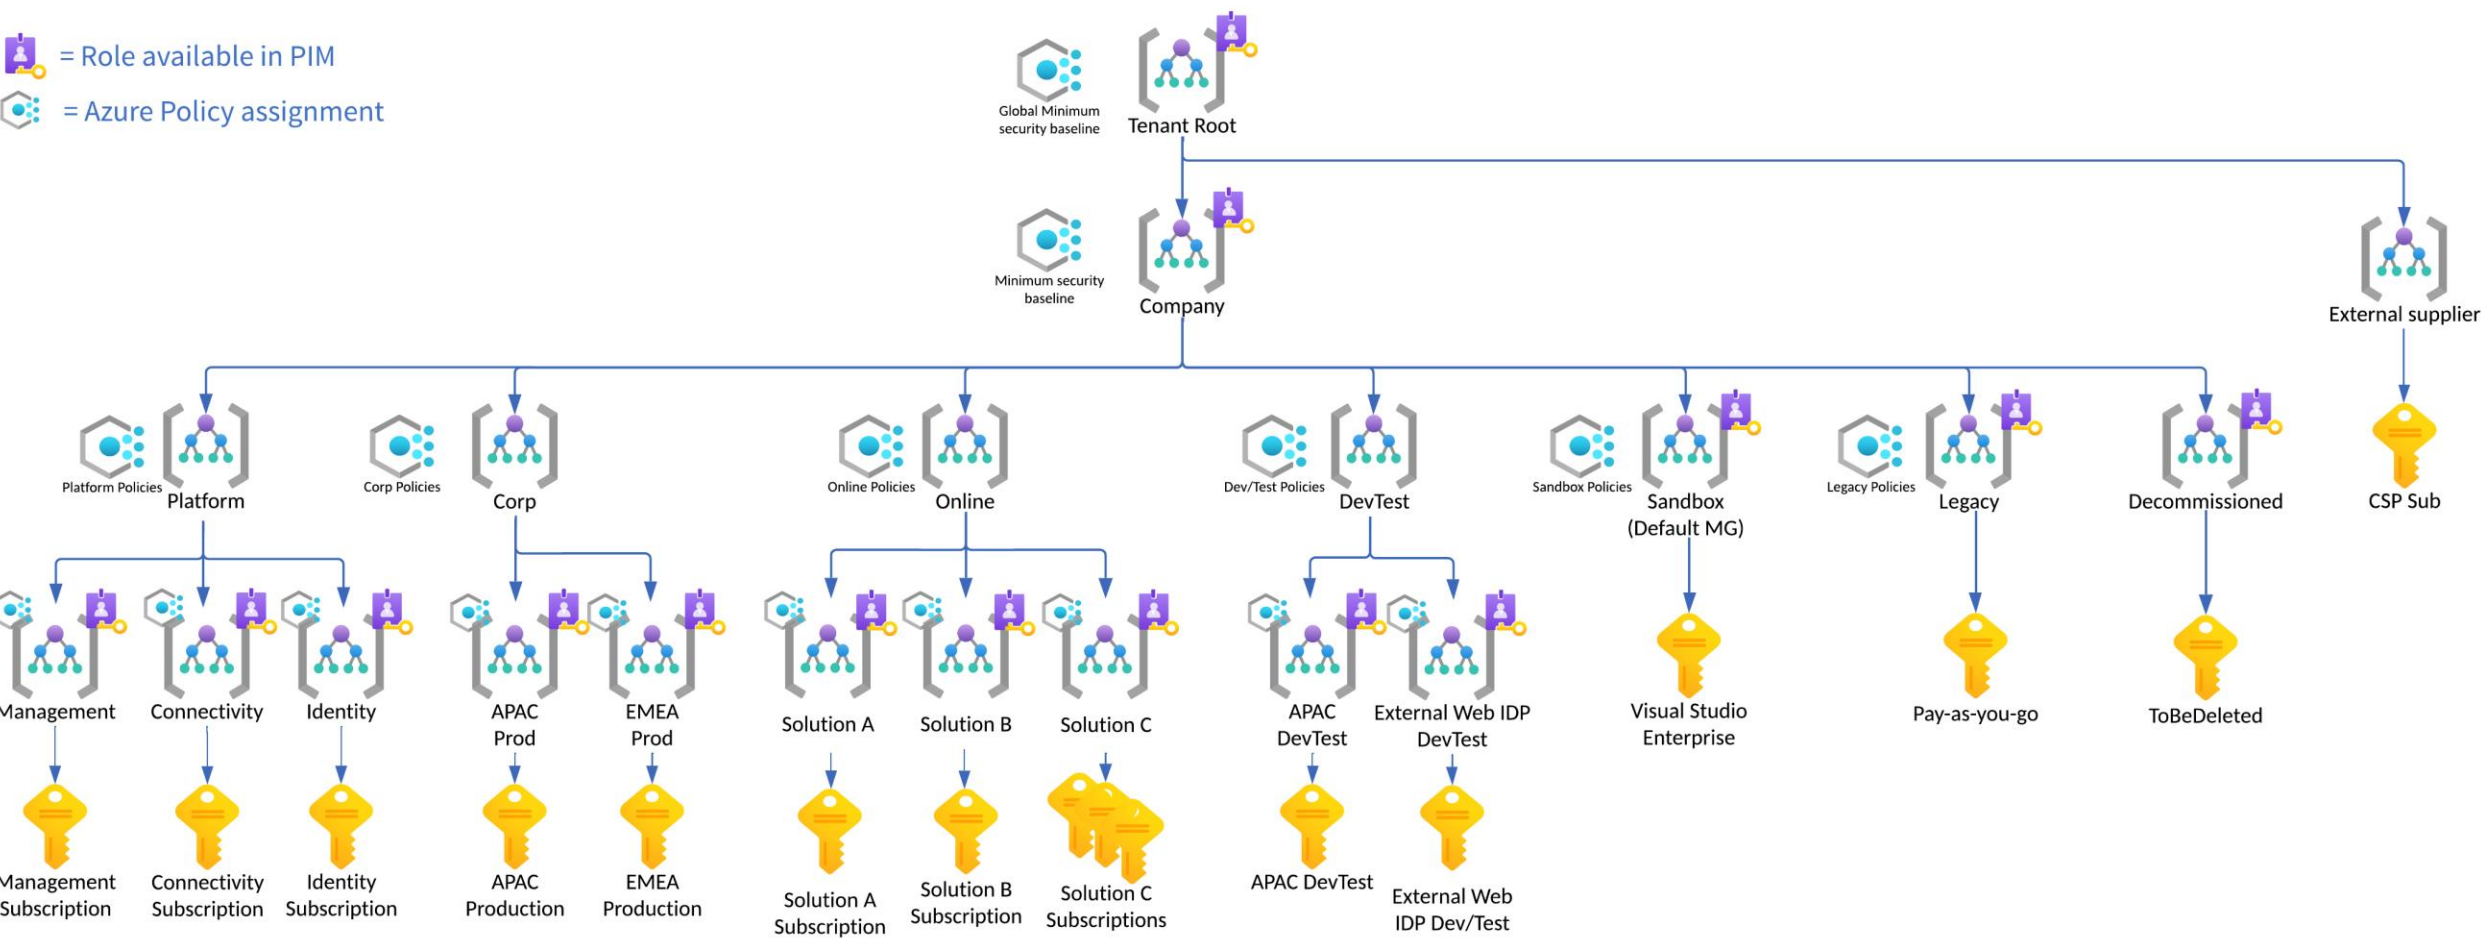

How to onboard?

But first!

Plan

 = Role available in PIM

 = Azure Policy assignment

Why?

Why?

**Why should we care about
Azure Arc?**

Why?

Central management, across clouds

Why?

Azure RBAC

Why?

Tagging

Why?

Azure Policy

Why?

Defender for Cloud

Why?

Azure Monitor

Why?

Change tracking

Why?

Inventory

Why?

Automanage

Why?

Update management center

Why?

**Central
management,
across clouds**

Tagging

Defender for Cloud

Change tracking

Automanage
